		Over 650	3 mL per 50 kg	

CRITICAL COMMENTS

Retreat when you first see ticks but not before at least 6 weeks after the previous treatment.

Maximum number of treatments per annual tick season: 3.

Apply in two bands, about 7 cm wide, one on each side of the spine between the rump and the shoulders with an approved applicator. DO NOT use any other applicator.

The weight of cattle should be determined by either scales or a weigh-band. Dose individuals according to the heaviest animal in weigh-band. Dose individuals ac the mob. DO NOT under dose.

There is no need to treat calves as long as they suckle treated cows. Calves will receive adequate protection from their mother. A reduced length of protection may occur in cows which are suckling calves.

iO Tick-Off Pour-On should not be applied to show cattle as a light scurfiness may be

10 Tick-Off Pour-On is a tick development inhibitor and kills ticks progressively. It can take 2 to 3 weeks for cattle to be visibly free of ticks. No additional treatment is necessary during that time, even on heavily infested animals. The development inhibiting effect of i0 Tick-Off Pour-On commences within 3 days of treatment.

Not suitable for cleaning cattle moving into 'gazetted' cattle tick areas.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION
