

AIRR Proudly Introduces A SPECTACULAR NEW RANGE of Products to its Stable

Zychem Technologies Pty Ltd is a Queensland based, specialist Chlorine Dioxide business that has been servicing Australian, New Zealand, Pacific Island and Asian export markets with its unique Chlorine Dioxide based products for over 25 years.

Chlorine dioxide is renowned as the Ideal Biocide

ExStinkt *PURE H2O TABLETS*

ExStinkt Pure H2O tablets rapidly dissolve in water to release Chlorine Dioxide, a powerful and biodegradable biocide that is scientifically proven to kill and treat mould, biofilm, bacteria, fungi, viruses, listeria and parasites including Cryptosporidium and Giardia. Available in 1g, 20g, and 100g tablets. **Quality, potable drinking water.**

Hoof Mate

Chlorine dioxide tablets specifically designed to be a more economical and more convenient answer to White Lightning to treat equine hoof diseases such as seedy toe, white line and greasy heel diseases. **Easy to use and exceptionally effective.**

ExStinkt *ODOUR GEL*

This product works by emitting constant low levels of chlorine dioxide for 3 to 4 weeks to kill air borne impurities and odour causing microbes, thus, creating a safe, effective and unobtrusive way to treat ongoing air quality. **Extended removal of all unpleasant smells.**

ExStinkt *ACCELERATOR*

A saviour product when there's a bad smell hanging around! It works like nothing else when you are faced with a sudden odour outbreak or odorous situation such as pets, smoke, vomit, mould, rubbish bins etc. Each kit releases 700mg/L of chlorine dioxide in less than half an hour, equating to 50mg/L in an area of 14m³. There is also an alternative slow release Odour Kit version which lasts upto 4 weeks for preventative treatment. **Rapid and full odour removal.**

DiPerox

A powder ClO₂ concentrate which together with **ZYDAC MAX ACTIVATOR**, creates Australia's most potent and economical chlorine dioxide liquid for large volume applications such as poultry farms, meat processing plants, horticulture such as mushroom farms, nurseries, orchards, fruit and vegetable growing and processing, vineyards, aquaculture, as well as swimming pools and cooling towers. **Best, economical, high-volume water treatment.**

Quazyme *Biofilm Buster*

The ultimate Biofilm Buster! Left untreated, biofilm can create a toxic haven for parasites, insect larvae and all forms of bacteria, able to dangerously impact water quality, odour and taste. Efficacy testing showed a 6.6 log reduction in e.coli (CFU/100ml) achieved using Quazyme at dose rate of 1:500 with a contact time of only 100 minutes. Ideal as an economical shock dose to waterlines wherever water quality is required. **No Biofilm.**
